Description

Looking for a reliable and safe workhorse? The 2023 Nissan NP200 1.6 8V Base + AC + Safety Pack is built for purpose and delivers solid value. Here's why this bakkie stands out: Strong payload capacity (800 kg) — it can haul what you need, whether it's tools, stock or equipment. Safety-first gear — ABS with EBD plus dual front airbags help give peace of mind for both driver and passenger. Comfort in the cab — air conditioning keeps you cool, especially on long drives or hot job sites. Rugged and practical build — rubberised load box protects your cargo and bed, power steering gives easier handling, and the 5-speed manual lets you make the most of the engine. Fuel consumption is reasonable (~8.1 L per 100 km) — helping reduce running costs. If you work hard, depend on your vehicle every day, or need something tough that doesn't break the bank, this NP200 model hits the sweet spot. Want to arrange a test drive or see how it handles with a full load? Happy to set that up.

Simon Vermooten Rd, Waltloo, Pretoria, South Africa

Located atCMH Ford Ballito
